

In 2023, talking avatar software to create videos is on the rise. With the help of avatar software, you can design compelling and believable talking characters to deliver your message or tell your narrative.

Take a look at this video

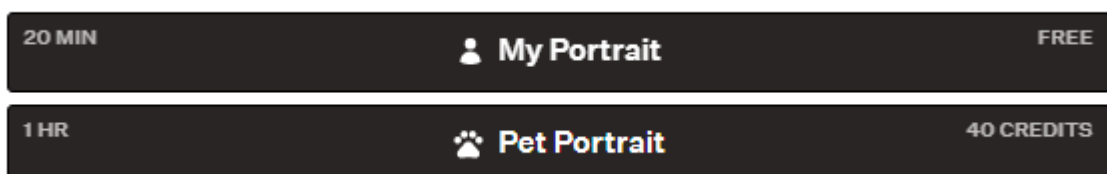

As you watch, you might think, "Hey, I want to try this too!" But we all know that finding free software can be quite a challenge. Well, here's the surprise: all the tools used to create this fantastic talking avatar video are free. You read that right; no hidden costs or subscriptions are required.

So, if you've been yearning to unleash your creativity and tell your stories in a whole new way, this is your chance. Read on!

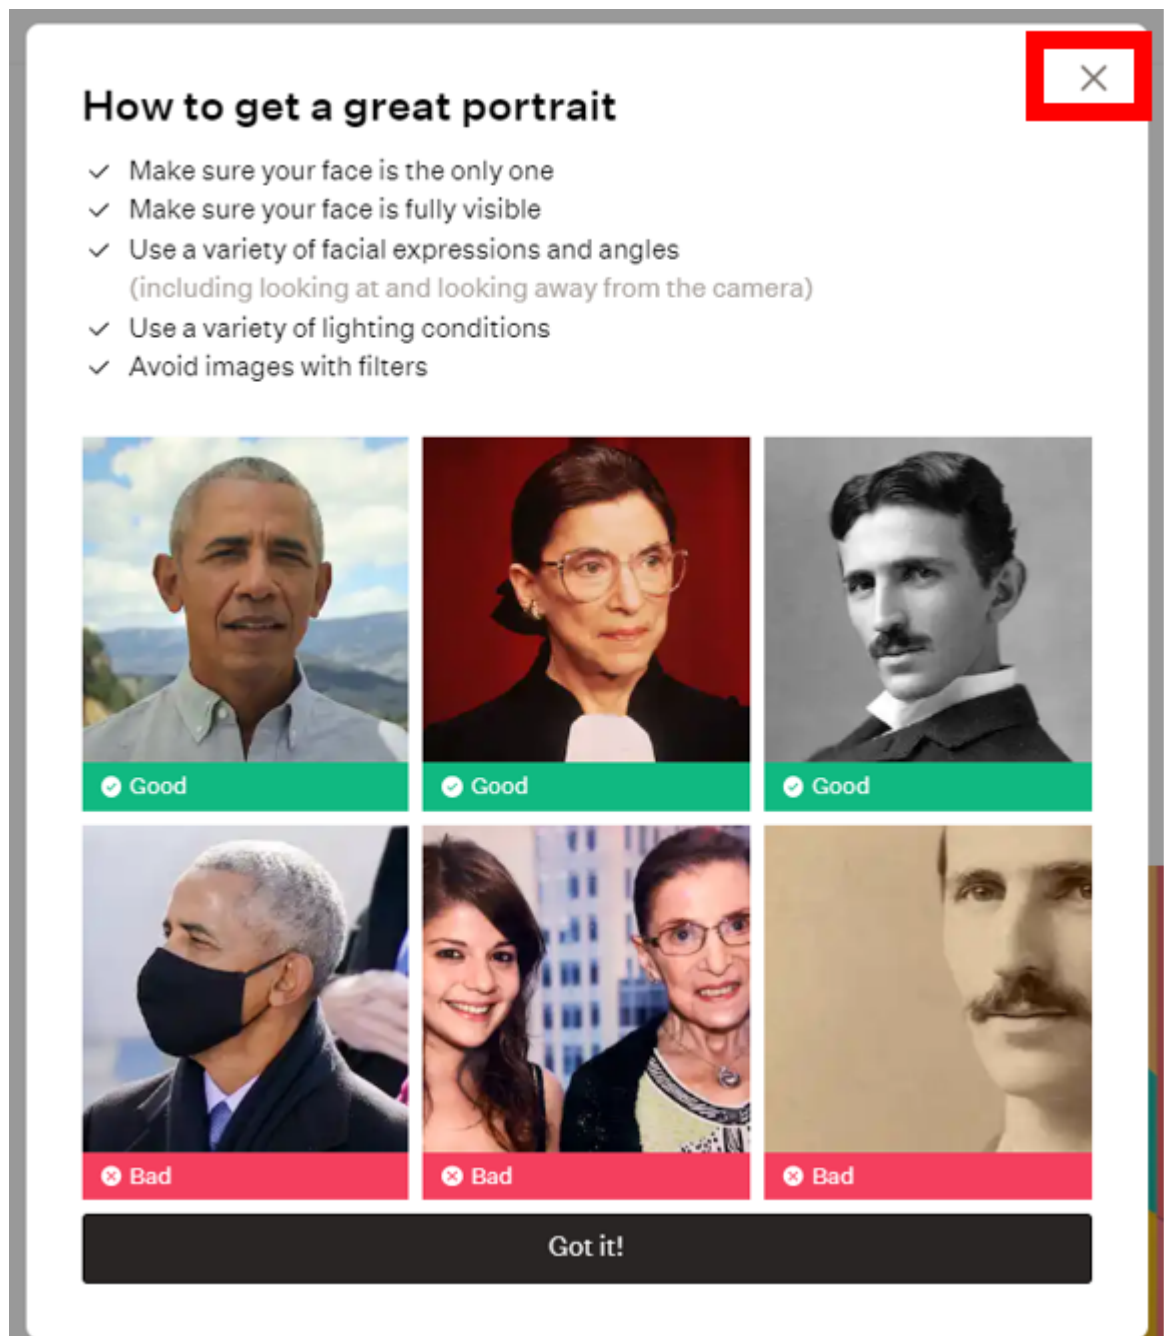

1. Visit the Vana Portrait website on your PC and press the "Sign in with Vana" button

2. Then click on "My portrait."

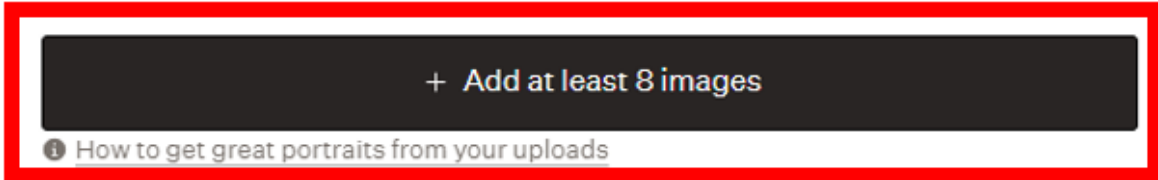

- Once the next page has loaded, a pop-up will immediately appear in the center of the screen. It will provide suggestions on how to capture a great portrait. You can click the "x" in the top right corner to minimize the pop-up.

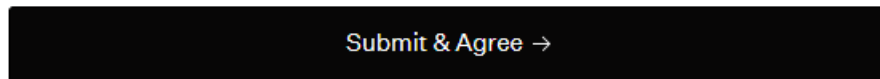

- Click on "+ Add 8 images" and ensure that you add at least eight photos. You can add more if you like.

Create your Portrait

UPLOAD 8 TO 10 IMAGES OF YOUR FACE. We use these images to create your custom Vana Portrait. This usually takes 20 minutes but may take longer during periods of high demand.

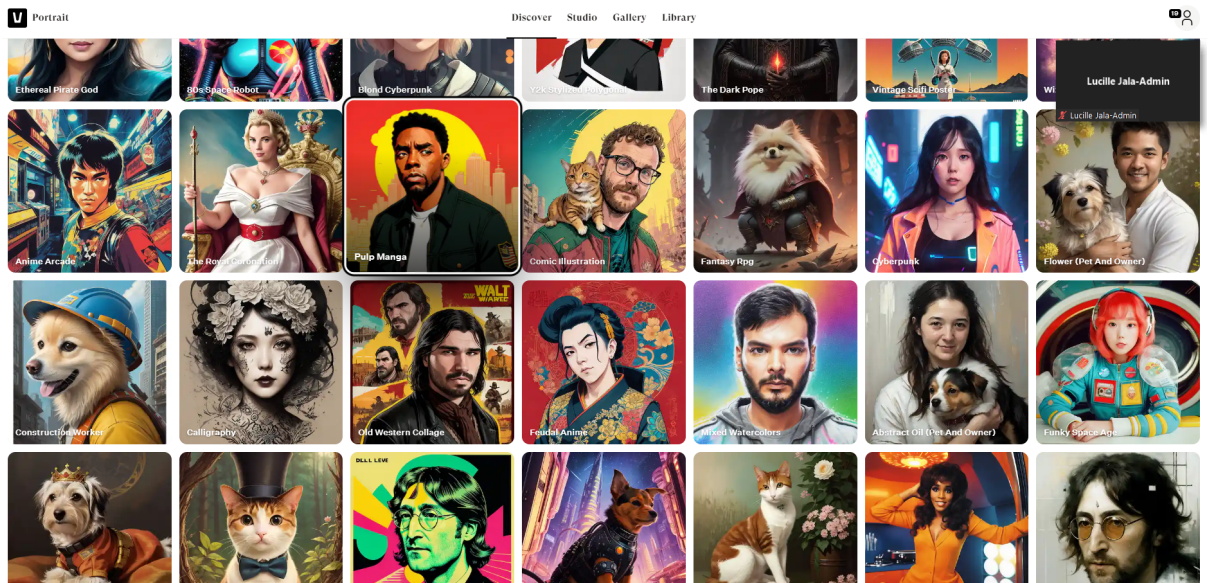

5. Click on "Submit & Agree."

- I certify that the photos uploaded are of me and that I am over the age of 18.
I also agree to the [Terms of Service](#) and the [Privacy Policy](#).

6. Wait for the upload process to complete. The time required will depend on the size and number of images you uploaded.
7. After the pictures have finished uploading, Portrait Vana will give you options for customization.

8. Choose your desired filter and click on "generate 10 images."

Dystopian Sci-Fi

Portrait of **Me**, tech noir, future city, dystopian, accurate anatomy, highly detailed, digital painting, artstation, concept art, smooth, sharp focus, illustration, Unreal Engine 5, 8K, art by greg rutkowski, giger

1 MIN

 **Generate 10 images**

5 CREDITS

 **Edit in Studio**

 **Share Link**

10. Once you are satisfied with the generated self-portrait, preview the final result.
11. Click on "Download all" to save the edited portraits to your specified location.

Prime Voice AI

The most realistic and versatile AI speech software, ever. Eleven brings the most compelling, rich and lifelike voices to creators and publishers seeking the ultimate tools for storytelling.

Click on a language to generate in a random text: English German Polish Spanish Italian French Portuguese

Hindi

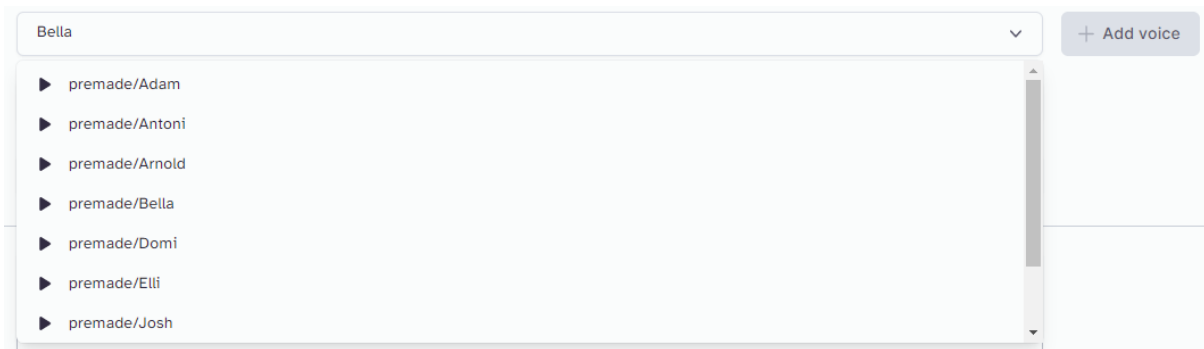

Eleven lets you voice any length of text in top quality, all while automatically matching what is being said with how it's being said. The model works best on longer texts, so type in at least a few sentences.

2. Select the voice you want to use.

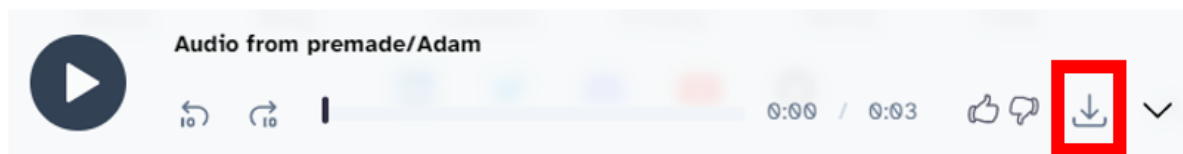

3. Enter the script you generated from ChatGPT.

4. Press "Generate" to create the voice.

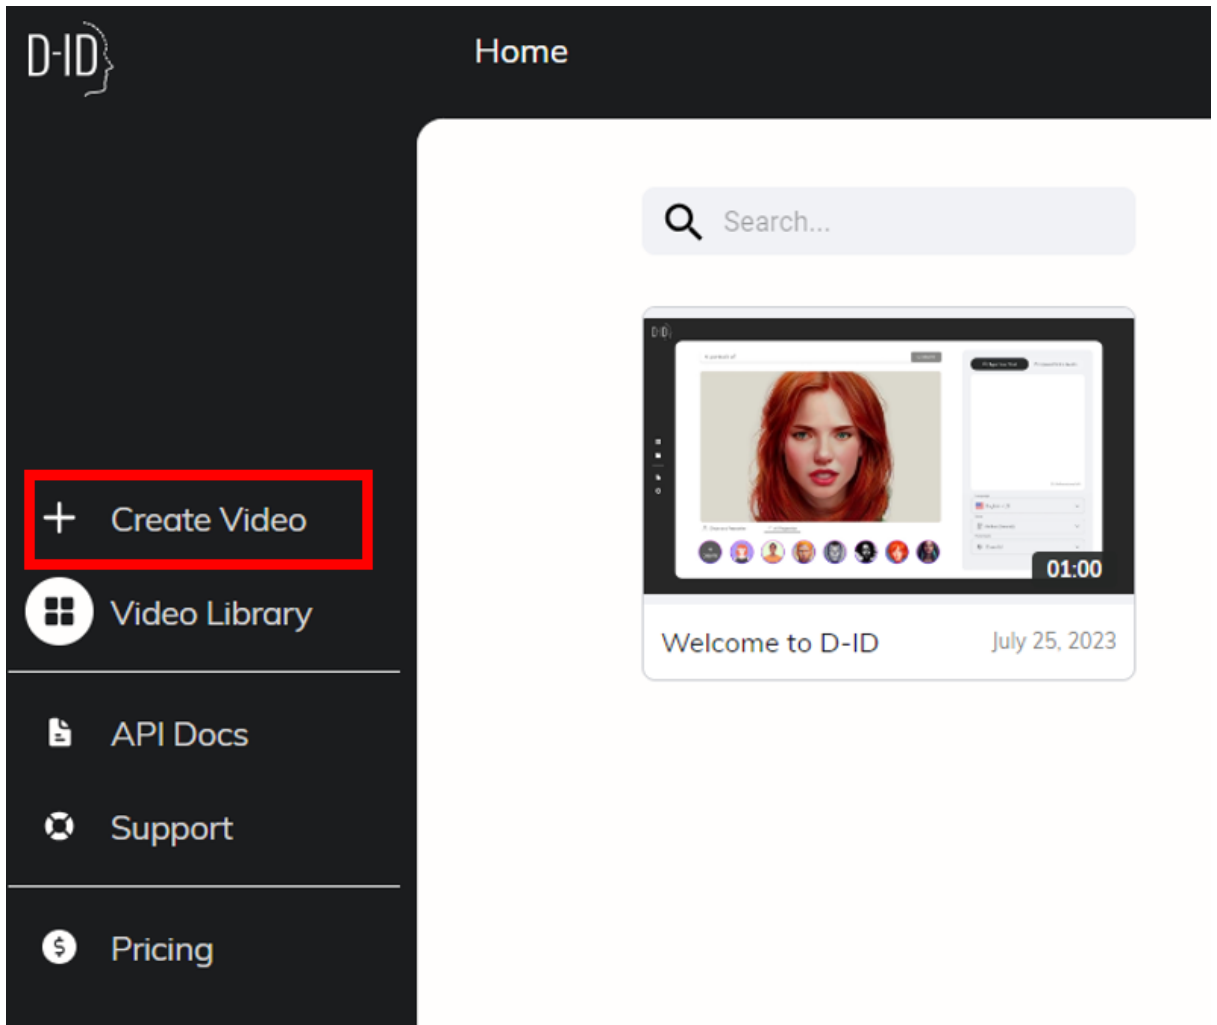

5. Download the voice by clicking on the save button.

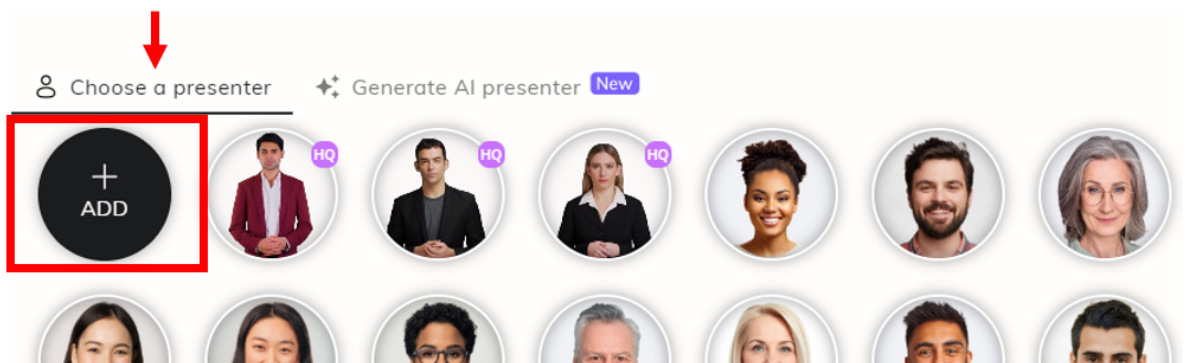

6. Now repeat the steps for the second avatar. Choose a different voice, press generate, and download the generated voice.

Access the latest AI tool called D-ID.

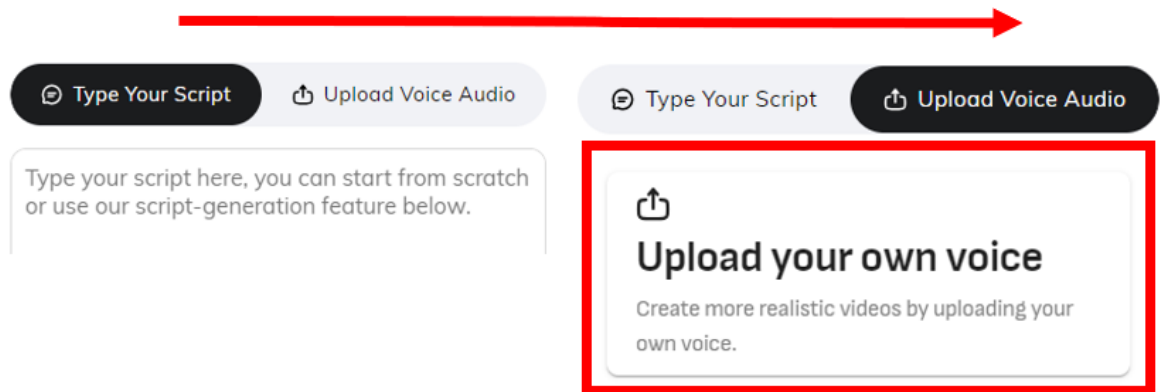

1. Initiate the process by selecting the "Create a Video" option.

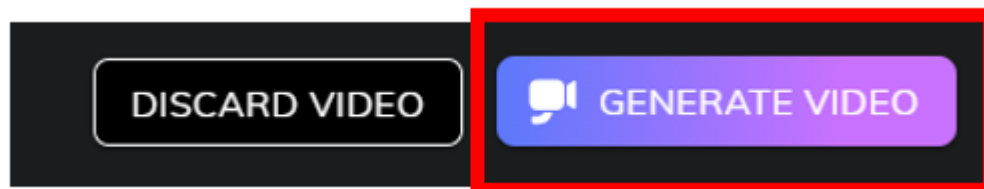

2. Under "Choose a Presenter," click on the "Add" button to upload the picture you wish to de-identify.

3. Select the desired picture from your local storage by clicking on it. Once you have chosen the picture or avatar, switch the script button to "Audio" and Upload the generated voice you obtained from Elevenlabs.

4. After selecting your presenter and uploading the audio, click on "Generate" to create your video.

5. Repeat the same process for the second avatar: add your portrait, select the desired presenter, upload your audio, and generate the video.
6. Finally, download both talking avatars.
7. Combine and edit your outputs using various free video editors, such as Filmora, Veed, Clip Champ, etc.

Enjoy your personalized avatars!
